Tire Chains***

Customer Information Regarding Fit Sport MUGEN “XJ” Alloy Wheels

The recommended tire for the Fit Sport MUGEN “XJ” alloy wheel is a **HIGH PERFORMANCE SUMMER TIRE**. These tires have a high-traction compound and tread pattern to provide superior acceleration, cornering, and stopping under most driving conditions. However, these tires are not suitable for driving on snow, ice or in temperatures below freezing, so all-season or winter tires must be installed on this vehicle for winter driving conditions. If you have questions regarding winter driving, please refer to your Owner’s Manual.

- The recommended tire size for the Fit Sport MUGEN “XJ” alloy wheel is **205/50R 16 87W**
- The factory Fit Sport tire 195/65R16 is **NOT RECOMMENDED** for use with the Fit Sport MUGEN “XJ” alloy wheel
- There is **NO SNOW CHAIN FITMENT** for this wheel/tire application on the Fit Sport Mugen vehicle
- If your route will include driving on snow or ice we recommend you install suitable wheels and tires, and if required by conditions or law additional traction devices such as snow chains in accordance with the recommendations of the vehicle owner’s manual
