Illustration of the Cross Bars Installed on the Vehicle

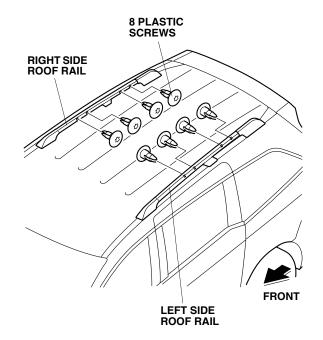

#### INSTALLATION

#### NOTE:

- The weight of the cargo must not exceed the maximum weight capacity of 75 kg (165 lbs).
- Be extremely careful not to damage the roof and other finished surfaces of the body when installing the cross bars.

# **Installing the Cross Bars**

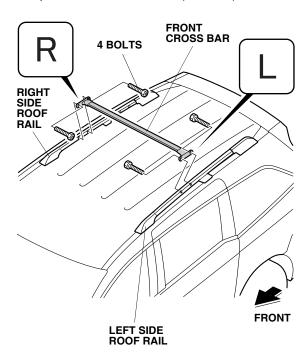

Remove the four plastic screws from left side roof rail, and the right side roof rail.

# www.collegehillshonda.com

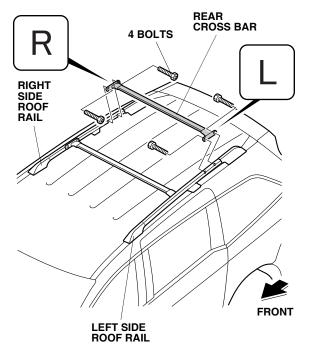

2. Install the front cross bar to the left side roof rail and the right side roof rail with two bolts.

Torque the bolts to: 10 N·m (7.3 lbf·ft)

3. Install the rear cross bar to the left side roof rail and the right side roof rail with two bolts.

Torque the bolts to: 10 N·m (7.3 lbf·ft)

### **USE AND CARE**

- Check the roof rail mounting bolts frequently, and re-tighten if necessary.
- Distribute the weight of the cargo evenly, and do not exceed the maximum weight capacity of 75 kg (165 lbs).
