INSTALLATION

Customer Information: The information in this installation instruction is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely add equipment to your vehicle. These procedures should not be attempted by “do-it-yourselfers.”

NOTE:

- The illustrations of the aluminum wheels are shown for reference purposes only.
- This kit should be installed only if the ambient air temperature is 15°C (60°F) or above.
- To allow the adhesive to cure, do not wash the vehicle for 24 hours. Make sure your customer is aware of this.

1. Remove the adhesive backing from sticker A.

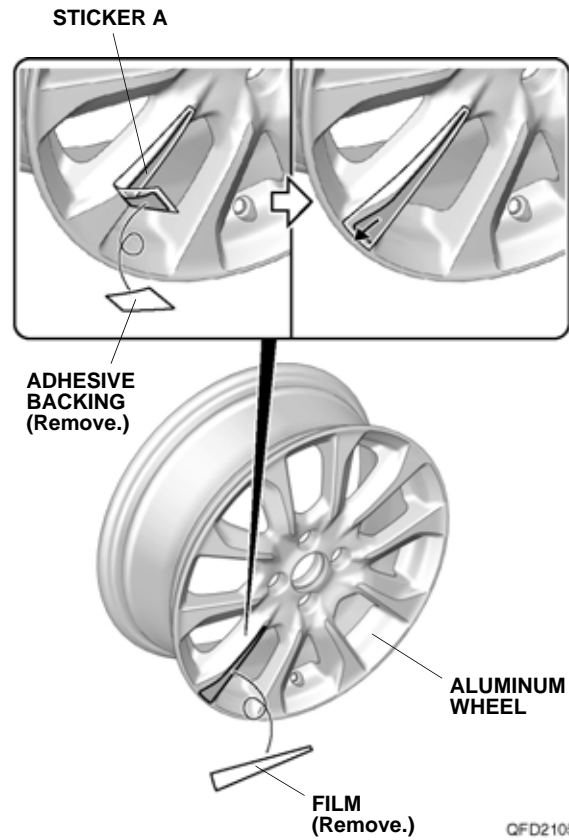

QFD2104AH

- Using an alcohol swab, thoroughly clean the area where sticker A will attach.

- Line up sticker A with the edge of the aluminum wheel, and attach it as shown.

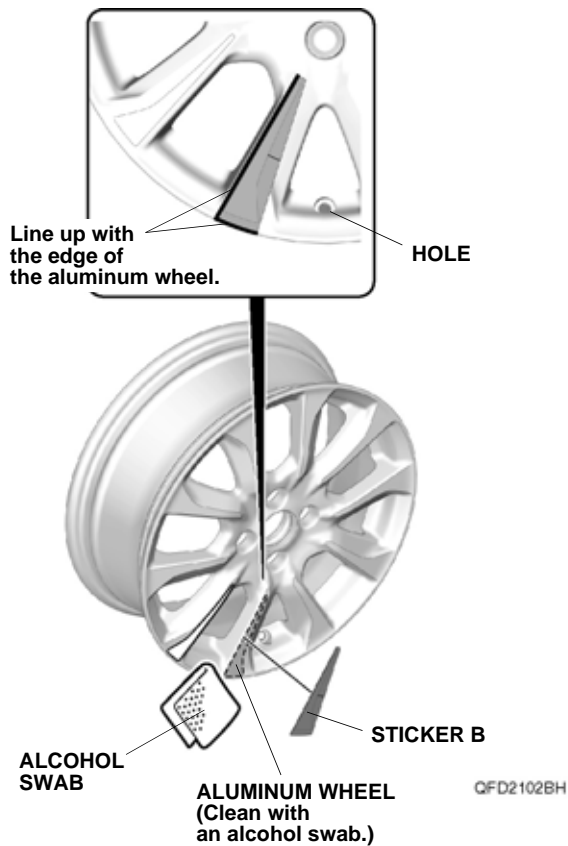

- While applying light pressure against the aluminum wheel, carefully remove the adhesive backing and attach sticker A as shown.

- Remove the film from sticker A.
- Remove the adhesive backing from sticker B.

- Using an alcohol swab, thoroughly clean the area where sticker B will attach.

- Line up sticker B with the edge of the aluminum wheel, and attach it as shown.

- While applying light pressure against the aluminum wheel, carefully remove the adhesive backing and attach sticker B as shown.

- Remove the film from sticker B.
- Repeat steps 1 through 10 to install the other stickers A and B to the other aluminum wheels.
